Reuters 3000 Xtra for Investment Management is an integrated news, content, analytic and trading solution that offers a commanding view of the global financial markets. This powerful platform allows you to monitor markets in real time, perform in-depth analysis and research on multiple asset classes, and execute trades all within a single application.

We provide direct, unfiltered access to industry-leading sources of financial information and analytics, allowing you to follow market action as it happens. We also provide effortless integration of content into your proprietary Microsoft® Excel spreadsheets. With Reuters 3000 Xtra for Investment Management, you get the insight you need to make more precise decisions, quickly and with confidence.

**ACCESS WORLD-RENNOWNED THOMSON REUTERS CONTENT SOURCES**

Reuters 3000 Xtra for Investment Management provides a robust lineup of content, including:

- **Reuters Fundamentals** – covers over 45,000 public companies in more than 100 countries going back to 1980
- **Broker & Independent Research** – real-time notes and global equity and fixed income research reports from nearly 700 brokers and independent research contributors
- **Reuters Estimates** – the world’s most comprehensive database of analyst estimates, in both detailed and consensus format, featuring up to 27 forecast measures for more than 20,000 companies in 80 countries
- **Global Estimate Aggregates** – includes country, sector, industry and index levels
- **StreetEvents** – comprehensive and accurate corporate disclosure information for over 18,000 companies including events, transcripts, briefs, and guidance
- **Thomson Ownership data** – global ownership and profile data including funds, firms and insider holdings
- **Fixed income and credit data** – comprehensive bond, CDS, and index data, including terms and conditions, pricing services, credit ratings, risk measures, and more
- **Funds data and screening** – comprehensive data on over 150,000 funds from Lipper, including price and performance, profiles, holdings, rankings, and more
- **Reuters Significant Developments** – real-time access and historical database of over 1.3 million significant developments on 40,000 active companies in 90 countries
- **Economic Indicators** – forward looking pools, real-time preliminary data, and revised time series data covering indicators such as trade balance, GDP, PMIs, consumer confidence, and more

**EXPAND INSIGHT WITH SOPHISTICATED ANALYTICAL TOOLS**

Outperforming your benchmark requires tools that help you see the big picture, visualize data relationships, and identify what information is critical, and what’s just noise. Reuters 3000 Xtra for Investment Management addresses that need and more.
Gain a wider perspective of the global economic landscape
Our database of global economic data provides a comprehensive range of relevant data items organized in a time series from Reuters EcoWin. From primary interest rates, money supply, and inflation figures to indicative industry figures such as employment rates and property price indices, you can quickly graph and assess trends and evaluate their impact on your investment strategy.

Investigate specific investment strategies
Reuters 3000 Xtra includes a wide range of advanced financial models and calculators such as asset swap, option calculator, correlation, and more that empower you to execute specific investment strategies.

Perform complex analysis quickly and easily
With Reuters 3000 Xtra you can easily evaluate and compare securities. Instrument searching is easy with a choice of free-text terms as well as names and codes, all within a single menu. The Cross Market Suite contains several ready-to-use models, including Bond Analysis, Bond Comparison, FRN Analysis, Convertibles Analysis, Bond Repos and more. You can create displays that meet your needs by linking prices, charts, quotes, and news. Or, if you prefer we can also custom-build worksheets and analytical tools for you.

TAKE THE PULSE OF THE MARKETS AND TRADE WHEN YOU’RE READY
Reuters 3000 Xtra puts you in touch with the markets. Our trading capabilities enable you to move straight from analysis to action using built-in, venue agnostic trading portals.

Complete the investment cycle with multi-asset trading
Reuters 3000 Xtra reaches the world’s largest broker-neutral trading community. You can access 15,000 executable real-time fixed income prices, or trade electronically with over 200 brokers in equity markets using Reuters Institutional Order Entry. We also offer streaming executable FX prices from multiple liquidity providers with seamless connectivity to post-trade systems.

Tap into market sentiment with Indications of Interest and Advertised Trades
IOIs and ATs from the hundreds of sell-side firms and thousands of institutions on the Reuters Network give you crucial insight into where the equity markets are going.

INCREASE YOUR EFFICIENCY AND CONNECTIVITY
Optimizing efficiency is a challenge for every professional investor. Reuters 3000 Xtra addresses this challenge by linking your workflow together in several ways.

Extend the power of your proprietary spreadsheets
Spend less time managing data with our workflow-centric Microsoft Excel® add-in. We seamlessly bring historical and real-time data into your spreadsheets to fuel your proprietary financial models.

Communicate in real time with peers and counterparties
Real achievement rarely occurs in isolation – it’s the result of collaboration. Reuters Messaging provides instant messaging and topic-focused chat rooms that put you in touch with a trusted, global community of over 100,000 financial professionals.

Stay on top of the markets anytime, anywhere
As a companion to the desktop, Reuters Connect for BlackBerry® delivers news, quotes, alerts and market intelligence to your handheld. Stay connected to the critical information you need, even when you’re on the move.
